

# POWAERATOR II<sup>®</sup>

## WATER TREATMENT SYSTEM

By Purefect

### *Discover the Benefits of Powaerator II*

With your new Powaerator II, you will immediately see, feel, and enjoy water the way it was meant to be. Using combination of modern water treatment technologies, the Powaerator II<sup>®</sup> Water Treatment System is able to reduce both moderate to low levels of iron (reddish stains) and hydrogen sulfide (rotten egg and/or sulfur odor) from well water.

### *Quality Water*

Water is processed through the Powaerator II<sup>®</sup> through a bubble of air which is replaced every few days. This natural air helps increase the dissolved oxygen in the water allowing the proprietary media blend to reduce the levels of hydrogen sulfide and iron. Having water with these contaminants reduced is beneficial throughout the entire home.

### *Odor & Iron Reduction*

No longer will your water have the strong obnoxious odor of sulfur or rotten eggs and/or the abundant stains left behind by the iron in the water will be virtually eliminated.

### *Chemical Free - Fully Automatic*

Unlike competitive products which also reduce iron and hydrogen sulfide and require powerful chemicals to regenerate or clean themselves, the Powaerator II is a chemical free system. It uses the oxygen contained in natural air and is able to automatically bring fresh air into the system as part of its regularly scheduled cleaning/backwashing.

### *Quality Products*

The Powaerator II<sup>®</sup> uses the latest in water treatment technology from Water Group. Since 1968, Water Group has distributed and manufactured quality water treatment equipment. Look to your local dealer for more products for conditioning your home's water or improving your drinking water quality.

## Advanced Controls

The Powaerator II system is controlled using an superior multi cycle digital control valve with advanced electronics. This control valve is fully adjustable and able to be set by your installer to backwash in accordance to your system needs. Despite the numerous features of this control valve, the intelligent engineering allows for a simple and reliable drive piston mechanism to ensure years or reliable service. The electronics built into this control valve are designed for installation in a wide array of situations. And the electronics are protected by an environmental housing engineered to handle the sun, rain, and other conditions found when units are installed outside of a home in warmer climates.

## Technical Specifications

Model #	PW-948	PW-1054	PW-1252
Tank Size	9"x48"	10"x54"	12"x52"
Volume of Media	1.0 ft <sup>3</sup>	1.5 ft <sup>3</sup>	2.0 ft <sup>3</sup>
Max H <sub>2</sub> S	1.5	3	4
Max Iron	2.0	3.0	5.0
Operational Flow	3.0 gpm	4.5 gpm	6 gpm
Peak Flow	6 gpm	10 gpm	15 gpm
Backwash Flow	4 gpm	5 gpm	7 gpm
Est. Ship Weight	145 lbs	250 lbs	365 lbs

*Quality Water, Quality Products, Quality Life*

### OUR 4 PROMISES:

- 1) Honest & Fair
- 2) Affordable Prices
- 3) On-time Service
- 4) Quality Products
